

SUNDHAR GANESH

DevOps Engineer | Healthcare IT Infrastructure | CI/CD & Observability

📍 Coimbatore, Tamil Nadu, India ✉ ganeshmuthvel303@gmail.com
🌐 [linkedin.com/in/sundhar-ganesh-771578227](https://www.linkedin.com/in/sundhar-ganesh-771578227) 🧳 Open to relocation

PROFESSIONAL SUMMARY

DevOps Engineer with overall **6+ years of experience** supporting healthcare IT infrastructure and production environments. Experienced in Linux and Windows server administration, CI/CD automation, observability, deployment modernization, and operational troubleshooting.

Hands-on experience implementing self-hosted DevOps workflows using **Jenkins and Gitea**, improving deployment reliability through Git-based automation, and building observability stacks with **Prometheus and Grafana**. Strong focus on infrastructure reliability, automation, and operational efficiency within critical healthcare systems.

CORE COMPETENCIES

- | | | |
|----------------------------------|-------------------------------|---------------------------------|
| ▸ CI/CD Pipeline Automation | ▸ Linux Administration | ▸ Windows Server Administration |
| ▸ Docker & Containerization | ▸ Jenkins · Gitea · Git | ▸ Prometheus & Grafana |
| ▸ Monitoring & Observability | ▸ Production Troubleshooting | ▸ Root Cause Analysis (RCA) |
| ▸ Infrastructure Automation | ▸ System Reliability & Uptime | ▸ VMware Virtualization |
| ▸ IIS / .NET Application Support | ▸ MySQL Administration | ▸ Developer Enablement |

PROFESSIONAL HIGHLIGHTS

- 6+ years of experience in healthcare IT infrastructure and production support environments.
- Implemented CI/CD automation using Gitea and Jenkins to modernize legacy deployment workflows.
- Designed observability stacks with Prometheus, Grafana, node_exporter, and windows_exporter for production visibility.
- Hands-on experience with Linux administration, Docker-based environments, and infrastructure troubleshooting.
- Strong focus on automation, reliability, and operational efficiency across critical environments.

PROFESSIONAL EXPERIENCE

DevOps Engineer, G. Kuppuswamy Naidu Memorial Hospital May 2026 – Present

- Implemented self-hosted CI/CD workflows using Gitea and Jenkins to modernize manual deployment processes.
- Automated application deployment workflows using Git-based version control and approval-based deployments.
- Configured Gitea repositories and Jenkins pipelines triggered through Git push events.
- Trained development teams on Git workflows and standardized deployment practices.
- Supported Docker-based environments and containerized infrastructure management using Portainer.
- Operated observability tooling (Prometheus, Grafana, node_exporter, and windows_exporter) to track infrastructure and application health.

System Engineer, G. Kuppuswamy Naidu Memorial Hospital Nov 2019 – Apr 2026

- Managed and supported Linux and Windows server environments powering healthcare and administrative systems.
- Supported production IIS application environments and day-to-day infrastructure operations.
- Set up Prometheus and Grafana on Linux servers to gain operational visibility and accelerate troubleshooting.
- Investigated intermittent IIS application outages and identified a memory leak in a co-hosted application through metrics analysis.
- Worked with VMware environments, server troubleshooting, and infrastructure support operations.
- Collaborated with development teams for application deployment, troubleshooting, and operational support.

DEVOPS PROJECTS & INFRASTRUCTURE AUTOMATION

CI/CD Pipeline Automation using Gitea & Jenkins

Stack: Gitea · Jenkins · Git · Linux · CI/CD

- Implemented a self-hosted CI/CD pipeline using Gitea and Jenkins to modernize legacy deployment workflows.
- Integrated Git push-triggered build and deployment workflows with approval-based production deployment.
- Replaced manual copy-paste deployment processes, reducing deployment time and minimizing deployment errors.

Centralized Source Code Management using Gitea

Stack: Gitea · Git · Linux

- Deployed and configured a self-hosted Gitea server for centralized source code management.
- Migrated development workflows from locally stored project folders to Git-based version control practices.
- Improved collaboration, source code traceability, and workflow standardization across teams.

Infrastructure Monitoring Stack with Prometheus & Grafana

Stack: Prometheus · Grafana · node_exporter · windows_exporter · Ubuntu

- Built an infrastructure monitoring and observability stack using Prometheus, Grafana, and node_exporter on Ubuntu Linux.
- Created dashboards for infrastructure metrics visualization, troubleshooting, and operational monitoring.
- Implemented windows_exporter monitoring for IIS and Windows server observability.

Containerized Infrastructure Management using Docker & Portainer

Stack: Docker · Portainer · Jenkins · MySQL · phpMyAdmin

- Configured Docker and Portainer for multi-host containerized service management.
- Managed Jenkins, MySQL, and phpMyAdmin containers and gained hands-on experience with container lifecycle operations.
- Worked with container networking, isolated environments, and service management through Portainer.

TOOLS & TECHNOLOGIES

Operating Systems	Linux (Ubuntu), Windows Server
DevOps & Automation	Jenkins, Git, Gitea, Docker, Portainer
Monitoring	Prometheus, Grafana, node_exporter, windows_exporter
Infrastructure	VMware, IIS, MySQL
Scripting	Bash (Basic), Python (Beginner)
Concepts	CI/CD, Observability, Infrastructure Automation, Production Support

CORE SKILLS & STRENGTHS

CORE SKILLS

- | | |
|-------------|----------------------|
| ▸ Linux | ▸ Windows Server |
| ▸ Docker | ▸ Jenkins |
| ▸ Git | ▸ Gitea |
| ▸ CI/CD | ▸ Prometheus |
| ▸ Grafana | ▸ Observability |
| ▸ Portainer | ▸ VMware |
| ▸ MySQL | ▸ Production Support |

STRENGTHS

- Production Troubleshooting
- Deployment Automation
- Infrastructure Monitoring
- Operational Reliability
- Developer Enablement
- Root Cause Analysis

EDUCATION

B.Sc Computer Science Bharathidasan University (Government State University), Tiruchirappalli (Trichy), Tamil Nadu, India	In Progress
